PiP Farming
Community

# How the channel runs itself.

Live results from Levels Socials, turned into clean posts and published every day. No manual work.

THE FLOW

# From live data to a post in under a minute

01

### Fetch

Pulls every strategy's live stats from the official Levels Socials provider API.

02

### Check

Skips strategies that aren't trading. Stops if the data is older than 36 hours.

03

### Design

Builds a clean post in the PIP Farming style, rendered in high resolution.

04

### Publish

The PIP Farming bot posts it to the channel with one short line.

THE SCHEDULE

# Two posts a day

| | |
|---|---|
| **13:00 · Hype** | One strategy, one number. Rotates between best win rate, strongest month, lowest drawdown and most trades. |
| **19:00 · Results** | The full Strategy Index: total ROI, win rate and max drawdown for every active strategy. |
| **Comments** | Every post opens a discussion in the PipFarming Community group, so people talk about the results in one place. |

THE RULES

# Built to be trusted

- Every number comes from the live API. Nothing is typed by hand or edited.
- Every post carries the risk disclaimer.
- Short, simple captions. One line, human, no hype words.
- If anything fails, it doesn't post. No wrong numbers, ever.

Bangkok time (GMT+7). Trading involves risk. Past performance does not guarantee future results.

WHAT IT POSTS

# Real examples from today

**Results** · the daily Strategy Index

**Hype** · one strategy, one number

WHAT'S NEXT

# Easy to grow

- Weekly recap every Sunday.
- Milestone posts, like a strategy passing a new ROI level.
- Trade-by-trade posts once the API shares single trades.
